

Vsevolod Skorokhodov

Research Interests: Multimodal Generative Models, Diffusion Models, 3D Computer Vision, Vision-Language Models.

Education

- Sep 2024–
now **M.S., EPFL, Lausanne, Switzerland.**
Major: Data Science
◦ Expected Graduation: February 2027, GPA: 5.27/6.0
- Sep 2020–
Aug 2024 **B.S., Moscow Institute of Physics and Technology, Moscow, Russia.**
Major: Applied Mathematics and Physics
◦ Graduated **with honors**, GPA: 9.1/10.0 (3.87/4.0), Top 5% of class
◦ **Thesis:** *FILIP-like Loss Function for Multimodal Classifier Training*

Selected Publications

- Sep 2026 **SEAR: Simple and Efficient Adaptation of Visual Geometric Transformers for Unpaired RGB+Thermal 3D Reconstruction, ECCV 2026, Malmö, Sweden.**
Vsevolod Skorokhodov, Chenghao Xu, Shuo Sun, Olga Fink, Malcolm Mielle
[\[paper\]](#) [\[code\]](#)
- Sep 2026 **PixSDS: Why Latent SDS Makes Noisy Pixels, ECCV 2026 Workshop LoViF, Malmö, Sweden.**
Vsevolod Skorokhodov
[\[paper\]](#) [\[code\]](#)
- April 2026 **D3DR: Diffusion Models are Secretly Zero-Shot 3DGS Harmonizers, TMLR.**
Vsevolod Skorokhodov*, Nikita Durasov*, Pascal Fua
[\[openreview\]](#) [\[code\]](#)
- 2023 **uSF: Learning Neural Semantic Field with Uncertainty, Optical Memory and Neural Networks.**
Vsevolod Skorokhodov, Darya Drozdova, Dmitry Yudin
[\[paper\]](#)[\[code\]](#)

Work Experience

- Sep 2026 –
now **Master Thesis, VILAB, Lausanne, Switzerland.**
◦ Developing methods for multimodal diffusion models.
◦ Supervised by [Prof. Amir Zamir](#).
- Jul 2025 –
Jan 2026 **Research Intern, Schindler EPFL Lab, Lausanne, Switzerland.**
◦ Worked on methods for 3D building reconstruction for downstream physical simulation.
◦ Adapted Visual Geometry Grounded Transformers (VGGT) to multimodal RGB–thermal scenes.
◦ Resulted in a first-author [paper](#) accepted to ECCV 2026.
- Sep 2024 –
Jun 2025 **Research Student, CVLab, EPFL, Lausanne, Switzerland.**
◦ Developed D3DR, a diffusion-based approach for realistic object insertion and harmonization in 3D Gaussian Splatting scenes.
◦ Resulted in a first-author [TMLR paper](#).
- Jul 2023 –
Oct 2023 **Visiting Student, King Abdullah University of Science and Technology (KAUST), Thuwal, Saudi Arabia.**
◦ Investigated methods for improving Neural Radiance Fields (NeRF) in scenes with large variations in spatial scale.
◦ Supervised by Prof. [Peter Wonka](#).

- Nov 2022 – **Research Intern**, *Center for Cognitive Modeling, MIPT*, Moscow, Russia.
Jun 2023
 - Developed an uncertainty-aware Semantic NeRF method.
 - Resulted in a journal [publication](#).
- Jul 2022 – **Machine Learning Engineering Intern**, *Yandex*, Moscow, Russia.
Oct 2022
 - Improved Yandex Search ranking by incorporating information from recent news.
 - Deployed the method in a search system serving approximately 1.6B daily queries.

Awards & Achievements

- 2021-2023 **Abramov Scholarship**, *MIPT*.
A 60,000 ruble per semester scholarship for students with top-tier educational performance
- 2020 **Prize Winner**, *All-Russian Olympiad of high-school seniors in Physics*.
- 2020 **Winner**, *Moscow Olympiad of high-school seniors in Physics*.

Hackathons

- autumn 2021 **Leaders of Digital Transformation**, *Finalist*, Moscow, Russia.
Development of a service to search for missing pets
- autumn 2021 **Tulahack**, *The best technical solution*, Moscow, Russia.
Recognition of how well medical masks are worn

Technical skills

- Coding** Python, C++
- ML/DL frameworks** torch, torchvision, pytorch lightning, transformers, diffusers, opencv, sklearn, pandas, numpy, scipy, matplotlib, timm, pyro
- Other** docker, git, bash, SQL, $\LaTeX$

Languages

- English (professional working proficiency), Russian (native)
- Certificates **TOEFL iBT**: 101/120, Advanced
